To: HKCOS Fellows

Dear Fellows,

Re: Appeal for Public Information Committee (PIC) Membership

As you may be aware the public media on health issues these days are flooded with a lot of erroneous messages from authors with or without hidden interests. Our fraternity feels an obligation to clarify misconceptions for our community, so that professional management on musculoskeletal issues would not be delayed.

The Public Information Committee of our College undertook a committed task to provide updated background professional knowledge to our community in layman language. In order to achieve this goal, contributions and help from our fraternity are essential.

The content of the PIC web page has been recently upgraded and you are most welcome to visit: www.orthoinfo-hkcos.org and give us any inputs that you might have.

May I appeal to all College Fellows to volunteer to join the committee as PIC committee members. Your contributions will help to safeguard the healthy of our community.

Your membership will be acknowledged in the College web pages and your accepted manuscripts will contribute to your CPD with the College.

I would be most grateful if you can indicate to the College Secretariat (fanny@hkcos.org.hk) in 2 to 3 weeks, your interest in participation as well as the subspecialty (subspecialties) field that you would like to be involved.

Looking forward to your return!

Dr. MAK Kan-hing
Chairman, Public Information Committee
The Hong Kong College of Orthopaedic Surgeons
